Ingredients

- 1816 g Beef Brisket mine was fatty if you want it less fatty you can trim it up or use the chuck roast instead
- 45.4 g Salt 2.5%
- 4.54 g insta cure #2 .25%
- 5.45 g garlic powder .3%
- 3.63 g black pepper .2%
- 3.63 g dextrose .2%
- 36.32 g Nonfat dry milk powder 2% (optional)
- Starter Culture - Flavor of Italy 1/2 tsp per in 1/4 cup of water for 5 pounds of meat
- Mold 600 brushed on the outside optional

Instructions

1. Grind chilled meat and fat together on a 10mm plate.
2. Mix chilled meat and add your starter culture along with your seasonings. Once your mince is sticky and very tacky stuff it in a 2inch (61mm) casing.
3. Record the weight and brush on the Mold 600 if you plan on using it.
4. Ferment at 75F with 80% humidity for 18-24 hours.
5. Once you reach your target pH (4.9 - 5.1) place your salami in a drying chamber (55F and 80% humidity) till you reach your target weight loss.
