

CALABRESE SALAMI

INGREDIENTS - per kilogram of meat

80% lean pork
20% pork fat (1/3 hand cut)
25g-27g fine sea salt
3g curing salt #2
7g sweet paprika
5g dovme biber
1.5g fennel seed
1g cinnamon ground
0.75g peppercorn, crushed
5g white sugar or dextrose, optional
30mL chilled red wine, optional
Pinch of starter culture
Salami Casings (Hog or collagen)

METHOD

1/ Grind the pork and fat together, using a medium blade. Add hand cut fat to ground meat.
2/ On a large table combine meat with salt, spices, sugar and cultures (if using for fermentation) and wine and massage/knead until meat becomes sticky.

3/ Fry a little of the mixture to test for spices and seasoning. It should taste a little salty - this is critical for the curing process.

Optional: Allow meat to rest for 12 hours covered in before filling casings. This is a good way to start fermentation if you don't have a suitable place after filling.

5/ Using a mincer with the sausage filling attachment or sausage cannon, pipe meat into casings.

6/ Apply compression/salami netting

Optional: Wipe down with vinegar and olive oil to prevent excessive mould growth.

7/ If fermenting, hang your salami at 22°C to 28°C and 80% to 90% relative humidity for 24 to 48 hours.

8/ Air dry the salami at in your CLEAVER at 10°C and 76% to 82% RH until you achieve 30% to 40% weight loss.
