

0 - Python (and Python Technologies)

- Python

<https://www.tutorialspoint.com/python/index.htm>

- NumPy

<https://www.tutorialspoint.com/numpy/index.htm>

<https://alison.com/course/an-introduction-to-numpy-library-for-python>

<https://alison.com/course/introduction-to-python-libraries-scipy-and-numpy>

Pandas

https://www.tutorialspoint.com/python_pandas/index.htm

<https://alison.com/course/python-for-data-science-from-the-basics-to-advanced>

<https://alison.com/course/master-the-pandas-library-in-python-programming>

Scipy

<https://www.tutorialspoint.com/scipy/index.htm>

<https://alison.com/course/introduction-to-python-libraries-scipy-and-numpy>

<https://www.tutorialspoint.com/fastapi/index.htm>

1 - Machine Learning (ML) Tutorial

<https://alison.com/course/machine-learning-for-absolute-beginners-without-coding>

https://www.tutorialspoint.com/machine_learning/index.htm

<https://alison.com/course/machine-learning-for-absolute-beginners-python-and-pandas>

No Prerequisites

2 - Artificial Intelligence Tutorial

https://www.tutorialspoint.com/artificial_intelligence/index.htm

Prerequisites to Learn Artificial Intelligence

The basic knowledge of Computer Science is mandatory. Knowledge of science, mechanical engineering, or electrical engineering is a plus.

PyTorch Tutorial

- <https://www.tutorialspoint.com/pytorch/index.htm>

Prerequisites

Before proceeding with this tutorial, you need knowledge of:

- Python and
- Anaconda framework (commands used in Anaconda).
- Having knowledge of artificial intelligence concepts will be an added advantage.

Machine Learning with Python Tutorial

- https://www.tutorialspoint.com/machine_learning_with_python/index.htm

Prerequisites

The reader must have basic knowledge of:

- Artificial Intelligence.

They should have a good knowledge of:

- Python

- NumPy
- Pandas
- Scikit-learn
- Scipy and
- Matplotlib

In addition, the readers should have a strong understanding of the fundamental concepts in mathematics including:

- calculus
- linear algebra
- probability
- statistics
- algorithms and
- data structures.

AI with Python Tutorial

- https://www.tutorialspoint.com/artificial_intelligence_with_python/index.htm

Prerequisites

We assume that the reader has basic knowledge about:

- Artificial Intelligence and
- Python programming.

He/she should be aware about basic terminologies used in AI along with some useful python packages like nltk, OpenCV, pandas, OpenAI Gym, etc.

Python Deep Learning Tutorial

- https://www.tutorialspoint.com/python_deep_learning/index.htm

Prerequisites

Before you proceed with this tutorial, we assume that you have prior exposure to:

- Python,
- Numpy,

- Pandas,
- Scipy,
- Matplotlib,
- Linux distribution,

prior basic knowledge of:

- Linear Algebra, <https://alison.com/course/introduction-to-linear-algebra>
- Calculus,
- Statistics and (<https://www.tutorialspoint.com/statistics/index.htm>)
- basic machine learning
